March 2018

Skilling Freshers and Professionals: Our Knowledge Sharing Mantra

TuracoZ Skill Development Program (TSDP) is an initiative of TuracoZ Foundation, a nonprofit initiative to upskill and train life sciences, medical, dental and para-medical graduates and post-graduates as well as support continuous professional development of industry professionals for career growth. The trainings are focused on medical writing, pharmacovigilance, how to conduct research, publish papers as seminars, workshops for students, faculty, industry, healthcare professionals and researchers. The trainings are conducted as seminars, workshops, online modules, faculty development programs and industrial trainings with the content and trainings tailor made for the target audience.

Our Blog: Bridging the Gaps Between Academics and Skills Required in Medical Writing

Author Ms. Madhu

📅 2018-02-26

Education not only influences the growth of a person but has a great impact on industrial as well as nation's development. Apart from education, trainings also determine the total skill capacity of a person. For quick development of any nation, it is very important to have well-skilled people. However, huge gaps in academics and trainings have been recognized worldwide.
